Forestry Drip Torch

This versatile Drip Torch is used for firing semi-dry fuels. It is an ideal tool for prescribed burning, back firing, roadside burning, slash and brush disposal.

The torch incorporates a ball check valve and fuel trap to prevent flashbacks.

Constructed from 15 gauge seamless aluminum with a rugged cast aluminum bottom to prevent wear and punctures. The spout is reversible for storage. A breathing tube with a shut-off prevents fuel leaks when in the storage mode. Parts are interchangeable with most other drip torches.

Specifications: Height: 14" closed – 25 1/2" assembled. Diameter: 6". Weight empty: 5 lbs. Weight full: 16 lbs. Capacity: 1 1/4 U.S. gallons
