

Communication Systems with Hearing Protection for High Noise Areas

HEADSETS WITH MICROPHONES AND RECEIVERS FOR 2 WAY COMMUNICATION

For attaching to industrial radios or cable communication systems.

FEATURES:

- Noise cancelling dynamic microphone. This means that the microphone actually blocks out most of the noise in your work environment and makes speech very clear
- Component construction reduces down-time and costs in repair and maintenance

Important Note:

For those work environments that are extremely noisy or, where respirators are worn a Throat Microphone model is also available which plugs into the head-set to enable communication in these particularly difficult circumstances.

ITEM#	DESCRIPTION
PLTMT7H79A	Headband model
PLTMT7H79B	Neckband model, used with or without safety cap
PLTHT7H79P3E	Fits slotted safety caps

HEADSETS (LISTEN ONLY) NO MICROPHONE

When attached to radios, in noisy environments you can receive clear communication through the headset and transmit through the microphone of the radio.

Headsets are available in all cup sizes including H6. You can order one side listen only, two sides, mono, or stereo. They come standard with either a 3.5mm or a 2.5mm mini plug that you can insert directly into most two way radios on the market. If a special adaptor is required, please tell us and we will modify the unit to fit your requirements.

ITEM#	DESCRIPTION
PLTHM79A	Headband model, if safety caps are not necessary. With 3.5mm plug
PLTHM79B	Neckband model, used with or without safety caps. With 3.5mm plug
PLTHM79P3E03	Communication headset fits slotted safety caps. With 2.5mm plug
PLTHM79PE35	Communication headset fits slotted safety caps. With 3.5mm plug
